To Whom It May Concern

I am writing this letter of recommendation on behalf of Medical Group Services, Inc. (MGSI).

Family Medical Centers of Tampa Bay have been a client of MGSI's for over 15 years. In the early years, we contracted with MGSI as we found that as a small practice it was more cost efficient to outsource these services then to supply them ourselves. As we transitioned from fee-for-service to manage care and capitation the billing and collection process became more complex and more difficult to manage. MGSI afforded us the ability to track both fee-for-service payments as well as capitation, revenue through their customized reporting systems. These reports gave us the ability to track our production regardless of payment mechanism.

It has never been more pertinent to have up-to-date and accurate reporting as it is today, in our complex and ever changing healthcare system.

Today Family Medical Centers of Tampa Bay is operating in a medical home environment. We are providing a multitude of services ranging from diagnostics to specialty care through our facility. This would not be possible without the competent and capable assistance of Medical Group Services, Inc.. They are highly qualified and professional, working strategically with our own staff to provide timely billing and collections and the critical practice statistics needed to manage a medical practice in today's environment. They have enabled this practice to maintain a competitive edge in the marketplace.

In conclusion, I say; thank you MGSI, thank you.

Sincerely,

Alan J. Iezzi M.D.
President
Family Medical Centers of Tampa Bay
